

# MyChart Bedside

## Stay connected during your hospital stay

MyChart Bedside lets you access your medical records and collaborate on your care. With MyChart Bedside you can:

- Learn about your condition
- View the medications you're taking
- Access test results
- See your daily schedule and care plan

**Ask your care team for a MyChart Bedside tablet, or to link your personal iPad or Android tablet to your record.**

### View your chart

See your vitals, lab results, and doctors' notes.

### Learn about your care

Learn more about your diagnoses, medications, and lab results with personalized education and reference information.

### Plan your day

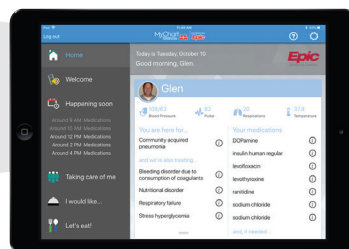

See your upcoming appointments and let our staff know about events like family visits.

### Put names to faces

Get to know your care members and see how each person helps take care of you.

Ask a member of your care team to get started!

MyChart Bedside is available on tablets for free from the App Store and the Google Play Store.
